Challenges in Diagnosing Data Network Issues

Instructor:
Adam Robertson

With 20 distinct networking protocols in use; you need a structured diagnostic routine to effectively address communication-related issues. A consistent approach improves efficiency and minimizes reliance on trial-and-error methods, such as unnecessarily disconnecting or replacing control modules.

- *Modern Vehicle Network Operation and Communication*
- *Resources for Gathering Information for Network Codes and Protocols*
- *Network Protocols and Network Topology*
- *Circuit Fault Analysis and Module Failures*
- *DVOM and Oscilloscope Techniques*

Wed 11/12/25 & Thu 11/13/25

6pm to 8pm
Pacific time zone

Code: **OLT479**
Cost: **$150 USD**
Per Student
