

Oscilloscope Essentials

Instructor:

Peter Coombes

- Testing Power Supplies and Ground Circuits Operating Under Electrical Load
- Testing Analog Sensor Signals - Temperature Sensors, Throttle Position Sensors and Speed Position sensors (Inductive Wheel, Crankshaft, Camshaft)
- Testing Digital Sensor Signals - Hall Effect Wheel, Crankshaft, Camshaft
- Diagnosing Alternator Charging Circuits
- Diagnosing Starter Circuit and Starter Motor
- Relative Compressions Testing
- Ignition Systems - Testing and Diagnostics
- Practical Workshop Examples

Saturday
04/18/26

8am to 12:15pm
Eastern time zone

Code: **OLT500**
Cost: **\$150 USD**
Per Student
