

Introduction to Keys & Immobilizer Systems -Domestic & Asian

Instructor:

Keith Perkins

A solid foundation on how immobilizer systems function across Domestic and Asian manufacturers. How different OEMs implement security, approach diagnostics, handle key cutting, cloning and programming. Covering PIN retrieval, EEPROM basics, NASTF access, and the essential tools needed to get the job done - plus a look at current industry challenges.

- OE Immobilizer System Overview
- Key Cutting and Programming Basics
- PIN Codes and EEPROM Intro
- NASTF Access and Requirements
- Tools and Real-World Challenges

Confidently diagnose, program, and service modern vehicle security systems across multiple OEMs.
