

MERCEDES-BENZ ELECTRONICS & BUS SYSTEMS

Learn to fast track the diagnosis of bus system faults. Understand system communication and data transfer on Mercedes-Benz vehicles. Take your bus and electrical diagnostic skills to the next level using the most efficient troubleshooting techniques.

- FlexRay™ - In-depth theory of operation, diagnosis and troubleshooting of this powertrain and chassis bus. This error-tolerant serial bus system is 10 times faster than CAN and requires a unique approach to diagnosis, troubleshooting and repair.
- CAN & Networking, Ethernet, Data Frames, D2B, MOST, LIN, FlexRay™ Ethernet - breaking down the frames.
- Dual battery systems: function and overview of various dual battery systems, auxiliary system, direct select and eco stop/start battery, charging and jump starting procedures.
- Complete review of Mercedes-Benz wiring diagrams, including symbol identification, color codes and approved wire repair procedures.
- Know the correct way to repair SRS wiring and connectors - how to properly solder and verify SRS repairs to factory specifications.
- Discussions of Semiconductor, Proton and Electron principals and how they create electrical circuits. Diagnosis utilizing Ohm's Law.
- Parallel, series circuit calculation and voltage drop calculation methods.
- Digital Multimeter measurements and the importance of understanding and verifying the units involved in any measurement or specification.

1 DAY CLASS

DATE:
Saturday,

August 5th, 2023

TIME:
8am - 5pm

CLASS ID: SEM1791

INSTRUCTOR:
Ian Lebbey

LOCATION:
Worldpac Training Room

1700 Lakeside Parkway,
Flower Mound, TX 75028
1 - 800 - 888 - 9982
EXT 5559

COST:
\$325 per student
(meals included)

Register at www.worldpac.com under Technical Training Seminar or call your **WORLD PAC** associate at 1-800-888-9982 x5470
