

EEPROM Essentials

Hands-On Soldering & Programming

— with Kevin Suttorp

What do you do when a control unit is no longer available?
Master the essential skills to work with electronic EEPROM components
and get that vehicle back on the road.

- Hands-on Desoldering an EEPROM
- Read/write and re-install an EEPROM
- The difference between in-circuit and out of circuit reading
- Programmer showdown - Comparing programmer advantages and limitations
- Soldering essentials
- Tooling and equipment
- Flux - Different types and application considerations
- Cleaner options and applications
- EEPROM - Identification and types
- Individual workstations provided

SATURDAY ■ 4/5/25
8:00AM – 5:00PM
