EEPROM Essentials
Hands-On Soldering & Programming

— with Kevin Suttorp

What do you do when a control unit is no longer available? Master the essential skills to work with electronic EEPROM components and get that vehicle back on the road.

- **Hands-on Desoldering an EEPROM**
- **Read/write and re-install an EEPROM**
- **The difference between in-circuit and out of circuit reading**
- **Programmer showdown – Comparing programmer advantages and limitations**
- **Soldering essentials**
- **Tooling and equipment**
- **Flux – Different types and application considerations**
- **Cleaner options and applications**
- **EEPROM – Identification and types**

Individual workstations provided
20 Student Limit

SATURDAY 3/28/26
8:00AM – 5:00PM

Class ID: SEM1974
$950/STUDENT
