

# EEPROM Essentials

## Hands-On Soldering & Programming

— with Kevin Suttorp

What do you do when a control unit is no longer available?

Master the essential skills to work with electronic EEPROM components  
and get that vehicle back on the road.

- Hands-on Desoldering an EEPROM
- Read/write and re-install an EEPROM
- The difference between in-circuit and out of circuit reading
- Programmer showdown - Comparing programmer advantages and limitations
- Soldering essentials
- Tooling and equipment
- Flux - Different types and application considerations
- Cleaner options and applications
- EEPROM - Identification and types

**Individual workstations provided  
20 Student Limit**

**SATURDAY 6/6/26  
8:00AM – 5:00PM**

Class ID: SEM1990  
\$950/STUDENT
